## BRITANNICA YEAR BOOK 1913

Compiled by the Editors of the Encyclopædia Britannica with the assistance of many of the best writers of their work issued 1912-13.

CONTAINING the latest and most trustworthy information by authorities about current progress in all new subjects of investigation, such as the battle against cancer and consumption, progress in ship-building or aviation, the newest improvements in industrial machinery or internal combustion engines, most recent advances in wireless telegraphy, in agriculture and metallurgy, military and naval expansion, the latest discoveries in geography, physics and chemistry, etc.

Also dealing in detail with national and international politics and current history in all lands; for example, the Morocco crisis, the Italian-Turkish War, Panama Canal controversy, Titanic disaster, Woman's Suffrage Movement, the Peace Movement, Labor Union and Syndicalism, the Revolution in China, the Balkan War, the High Cost of Living, and all other significant events and phases of the day.

### A Bargain to Those Who Act Now

1000 pages, 200,000 words, 17 x 2 1/2 x 1 inches, printed on Dainford's India paper, bound in the same style as the Encyclopædia Britannica. Prices to be increased 25 cents on publication. Cloth, \$1.75; Full Sheep, \$1.25; Full Limp Binding, \$3.00; Full Morocco, \$3.50, now ONE-HALF what other publishers would charge.

### A Readable Narrative of Current Progress

There exists no annual which deals in detail with world activities as a whole, none whose scope is broad enough to make it a record and an interpreter of events as well as an authoritative register of the progress of the sciences. The Britannica Year-Book has been planned as broad as the same as those of the Encyclopædia Britannica itself, to do for the multifarious activities of the world during 1912-13 what the Encyclopædia does for all human knowledge as the product of 6,000 years of growth. The volume is small enough to be carried in one's pocket or slipped into a traveling bag.

### Daily, Unique, Necessary

Such a book is absolutely necessary because our modern life is so complex, events crowding upon one another so rapidly as to make it impossible to distinguish what is important from what is inconsequential, to sift the essential and the vital from the vast mass of non-essentials. The Britannica Year-Book sows up and interprets the whole bewildering material scope of contemporary knowledge, describing, in interesting style, its substantial changes, real advances and essential progress.

### A Record of the World's Work

Two pages are devoted to the British Empire, 100 to the United States and possessions, 100 to other countries, and 500 to a valuable and unique series of original articles, constituting a complete record by specialized authorities of work done in 1912, in all subjects and all spheres, in all countries, by the chemist, the biologist, the anthropologist, the astronomer, the geographer, the explorer, the technologist, the physician, the statesman, the physicist, the philosopher, the educator, the educator, the lawyer, the engineer, the ship-builder, the agriculturist, the politician, the social reformer, the dramatist, the apologist, the musician, the architect, the inventor, the painter and engraver, the sculptor, the sportsman, the athlete and the traveller.

### All Lands, All Spheres

The Year-Book, like the Encyclopædia Britannica, is world-wide in its scope, covering not only the march of events, but the physical, economic, political and social progress of all countries, and of every State of the Union. Population, Agriculture, Industries and Manufactures, Finance, Commerce and Trade, Communications, Government, Administration, Army and Navy, Education, Religion, Charities, Legislation, Law, Justice, Crime, etc.

# SOUTH AMERICA

OBSERVATIONS AND IMPRESSIONS

By the Right Honorable JAMES BRYCE, British Ambassador

Author of "The American Commonwealth," "The Holy Roman Empire," etc.

## British Comment

"Mr. Bryce has written one of the most fascinating books of travel in our language, and he has at the same time contrived to give the world a valuable political study of the chief South American States."—*London Daily Mail*.

"Accurate and essential information, cautious and well-considered speculation and judgment based not only on shrewd observations of the matter in hand, but on an easy familiarity with the comparisons afforded by the world at large and its history are distinctive qualities of Mr. Bryce's book. . . . His published conclusions possess an international value."—*London Daily Telegraph*.

"This book is a gift for which to thank the gods. Within the limitations of a review, it is impossible to give more than a faint hint of all the wealth of reflection, observation and learning in these chapters. The whole book is memorable, worthy of the topic and the man."—*London Daily Chronicle*.

"We advise our readers to read 'South America' and study it carefully."—*The Westminster Gazette*.

## American Comment

"The most comprehensive and certainly the clearest and most illuminating work that has yet been written on the history and present conditions of the South American Republics."—*San Francisco Chronicle*.

"Particularly admirable and enviable . . . the product of an ample preparation, 'South America' takes rank as a standard work from the day of its appearance."—*New York Sun*.

"A comprehensive work devoted to the continent from the pen of the man best fitted to comment impartially on what he has witnessed. . . . This new book by the distinguished ambassador should find a place in every well-equipped library."—*Boston Budget*.

"A substantial contribution at first hand to our knowledge of South America by an adept in the art of graceful, literary expression."—*Boston Herald*.

"A wonderfully fascinating and informative work . . . will enhance Mr. Bryce's reputation as a keen, scholarly and analytical commentator on the people and governments of the world."—*Philadelphia Record*.
